DECREE OF THE RECTOR OF INSTITUT TEKNOLOGI NASIONAL BANDUNG
No. 151/SK-Rektor/Itenas/IX/2026

Regarding

"ITENAS Commitment to Achieving Net-Zero Greenhouse Gas Emissions"
(Amendment to Decree No. 002a/SK-Rektor/Itenas/II/2023)

Institut Teknologi Nasional Bandung (ITENAS) recognizes climate change as a critical global challenge and is committed to actively contributing to mitigation effort by achieving Net-Zero Greenhouse Gas (GHG) Emissions. This commitment is an integral part of ITENAS' implementation of the Tridarma of Higher Education and sustainable campus management.

As part of its long-term commitment to addressing climate change and supporting global efforts to limit greenhouse gas emissions, **ITENAS establishes a target to achieve Net-Zero Greenhouse Gas Emissions by 2050.**

To achieve this goal, ITENAS commits to:

1. Establishing a clear and measurable Net-Zero GHG emissions target, aligned with Indonesia's national policies and global frameworks such as the Paris Agreement and the Sustainable Development Goals (SDGs).
2. Conducting regular GHG emissions inventories, covering direct emissions (Scope 1), indirect emissions from energy (Scope 2), and other relevant emissions (Scope 3).
3. Developing and implementing emission reduction strategies, including energy efficiency, renewable energy adoption, sustainable waste management, and reduction of the campus carbon footprint.
4. Integrating sustainability principles into education, research, and community engagement, fostering innovation and science-based solutions for GHG emission reduction.
5. Encouraging active participation of the entire academic community, including students, faculty, and staff, in promoting a low-carbon culture through awareness, education, and behavioral change.
6. Strengthening collaboration with government, industry, and strategic partners, to support decarbonization initiatives and technological development.
7. Improving resource efficiency, including water, energy, and material use, as part of indirect emissions reduction efforts.
8. Implementing transparent Monitoring, Reporting, and Verification (MRV) practices, to ensure accountability and continuous improvement.
9. Periodically reviewing and updating policies and targets, in line with advancements in science, technology, and climate-related regulations.

Through this commitment, ITENAS aspires to become a higher education institution that actively contributes to a low-carbon, resilient, and sustainable future.
